

# Canning Supplies Checklist

Necessary canning supplies differ from person to person. For instance, if you have no plans to pressure can, you don't need a pressure canner. If you don't plan to make jam, you don't need pectin. With that in mind, I've included a N/A (not applicable) column on the table below. Simply put a checkmark there if you don't need the item. I've included a few items that may need replacement, such as the rubber gasket in pressure canners. I've left a couple of blank rows at the bottom for you to write in your own items.

|                               | Need | Currently Have | Needed | Done | N/A |
|-------------------------------|------|----------------|--------|------|-----|
| Water Bath Canner             |      |                |        |      |     |
| Pressure Canner               |      |                |        |      |     |
| Canning Jars, Lids, and Bands |      |                |        |      |     |
| Canning Jar Lifter            |      |                |        |      |     |
| Canning Funnel                |      |                |        |      |     |
| Pressure Canner Weight        |      |                |        |      |     |
| Pressure Canner Gasket        |      |                |        |      |     |
| Vinegar                       |      |                |        |      |     |
| Pectin                        |      |                |        |      |     |
| Clear Jel                     |      |                |        |      |     |
|                               |      |                |        |      |     |
|                               |      |                |        |      |     |
